Transformation
through integration

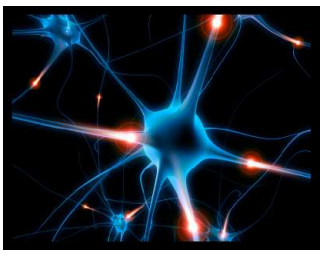
Life Enhancement Acupressure Program

LEAP-Foundation Training 3 (LEAP-FT 3)

Glial Cells

Instructor: Dorota Aamirah Milczarek MA

A Revolution in LEAP - Integrating the Second Half of the Nervous System!



There are only two cell types in the **Nervous System – Glial Cells & Neurons**. While Glial Cells out-number Neurons by 40 to 100 times, it was believed they only provided a matrix and passive support for Neuron function, and Neurons did all the Neurotransmission! However, recent discoveries show that the **Glial Cells – the other half of the Nervous System** - are actively involved in Neurotransmission as well as Neurons!

Now research has exploded showing in detail the exact nature of the **powerful role Glial Cells play in Neurotransmission**, causing a revolution in our understanding of this essential process – a true Paradigm Shift in our understanding of Neurotransmission.
Even now, most recent neurology texts only hint at this revolution and are still dominated by the Neuron Doctrine that states categorically that Neurons are the total basis of Neurotransmission!

In LEAP-FT 3 you will learn the Glial cells are involved in:

- Forming the Blood Brain Barrier
- Scarring - a possible cause for epileptic seizures
- Environmental toxins and brain reactions
- Memory set down and loss
- Our brain immune system
- Brain environmental regulation
- Brain tumours and other imbalances in the brain
- Cerebro spinal fluid production and distribution
- Cerebro spinal fluid Brain Barrier - did you even know we have one... and why?!
- Transduction of mental decisions into neuronal action
- Peripheral Nervous system nerve repair and wound healing
- Myelination in the Peripheral and Central Nervous Systems - the basis of Multiple Sclerosis and other neurological disorders when things go wrong
- Hormone effects on our brain, including adolescence and menopause
- Emotional, short & long term stress effects on Glial Cell Neurotransmission
- Control of which neurons fire and their speed providing brain synchrony - *the basis of Brain Integration*

..... plus much more!!

Condensing the understanding of this new knowledge, Dr. Charles Krebs developed, along with Ian Stubbings, formatting for the Glial Cells, and worked out its application to the Second half of Brain Integration! It turns out that Glial Cell Integration and Neuronal Integration are totally separate functions – yet extensively interact! So, you can have 100% Neuronal Integration and little Glial Cell Integration or vice versa. Up to this point, LEAP had only been doing Neuronal Integration when both Neuronal & Glial Cell Integration is complete – you get some truly remarkable results not possible before!

"It cannot be a "Belief System", I could not believe the results I was getting at first!"
– Dr. Charles Krebs

This LEAP course is fully accredited with the Australian Kinesiology Association for either **Kinesiology and/or Anatomy and Physiology** (50%) hours.

Do not miss this opportunity to Revolutionize your LEAP Work

Prerequisites: LEAP BI 1 or LEAP FT 1, FT 2

LEAP FOUNDATION Training 3 (LEAP-FT 3)

4 days

LEAP Instructor: Dorota Aamirah Milczarek MA

January 30/31 February 6/7 2027

Montreal in Person and on Zoom

US$ 675.00 Early Bird Non refundable deposit US$200.00 by January 11
